# X-Series Performance ECU

- IP68 rated for water and particle ingress
- 5-way map selection switch for different driving modes
- Engine & drivetrain protection systems such as EGT (exhaust gas temperature) control and torque reduction on gear change
- OE Style wiring harness with gold plated terminals and IP rated connectors
- Extensive library of calibration files to suit most popular aftermarket performance upgrades
- Reduced fuel consumption
- Powered by M1 Technology
- Designed, engineered and manufactured in Australia
- Remote access for support and updates
- Product and Engine/Drivetrain warranty

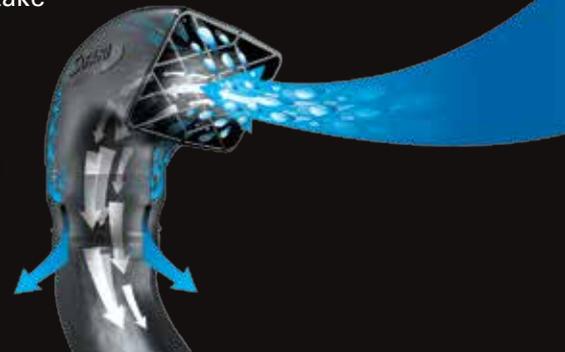

Results at engine flywheel

## 4" Performance Snorkel

- Designed to provide a 45% increase in airflow over the factory air cleaner assembly
- Design and flow tested by in-house engineers for maximum performance
- Developed in conjunction with other ARMAX™ performance enhancement products
- Safari's own Industrial Spec UV Stabilised Polyethylene
- Water tight, raised air intake
- A life time warranty
